

Hobby grant criteria 2024

The Student Union LTKY grants a hobby grant to registered associations. The purpose of the grant is to support events and purchases that promote the well-being and hobby opportunities of students at the LUT universities. The hobby commission consisting of members of the boards of LTKY and KOE is responsible for granting the grant. The size of the granted amount is also affected by previously granted grants.

1. You can apply for a grant before or after the event/purchase. Grants are admitted at specific times.
2. The application must be submitted to the community specialist, who will check the applications and request possible corrections and additions. E-mail: yhteisoasiantuntija@ltk.fi
3. Insufficiently completed applications are returned by the community specialist to the applicant/association for correction already before the meeting where the grant applications are processed.
4. The grant application must be carefully and objectively filled by using LTKY's official grant application template, which can be found on the Hobbla.fi website.
5. The application must include the number of benefiting LTKY members and KOE members, as well as the budget calculation for the event/purchase that is the subject of the application.
6. In addition to general information, the application must include the association's detailed action plan and budget estimation for the entire year.

In addition to the hobby grant, LTKY grants other grants to associations that are included in LTKY's list of associations. Grants are awarded for projects, acquisitions and general activities.

Receiving a hobby grant does not prevent the association from applying for LTKY project grants, but other grants that may have been awarded are taken into account when processing them. More information about LTKY's grants can be found at www.ltky.fi/en/services-for-organizations
